

GWS Manual Wire Bending Testing Machine

Picture is for reference only

Application:

This testing machine is mainly used for repeated bend test of metal wire and testing performance and defect of bearing plastic deformation at the process of repeated bending metal wire.

Main Technical Parameter:

Mode	GWS-2	GWS-8
Bending wire diameter	Φ0.5 ~ Φ2mm	Φ0.5~ Φ8mm
Forward bending angle	0° to 90°	0° to 90°
Reverse bending angle	0° to 90°	0° to 90°
Dimension	200*200*450	200*200*450
Machine weight	10 kg	10 kg
