

HST-934.1s Barcol hardness tester

Picture is for reference only

Application:

The barcol hardness tester is an indentation type hardness tester. It is fast, simple, and easy to test. It can be used to quickly test the hardness of aluminum and aluminum alloy materials and meet the American standard ASTM B648.

Technical Parameters:

Model:HST-934-1s

Range:0~100HBa

Effective measurement range:equivalent to 25~135HBW

Indication error:42~52 HBa ± 2.0 HBa;84~88 HBa ± 1.0 HBa
