

HST-MPG1A Belt Surface Grinding Machine

Picture is for reference only

1. Application:

HST-MPG1A model grinding machine is mainly used for the surface of spectral analysis sample and metal, ceramic, glass and other devices such as polishing. The machine has compact structure, single wheel speed, grinding wheel with different grain size, hardness. This machine is a smooth rotation, low noise, convenient operation, high efficiency. It is suitable for factories, scientific research institution.

2.

2. Technical Parameters:

MODEL :HST-MPG1A

Grinding disc diameter : Φ 400mm

Speed :1400r/min, 2800r/min

Input voltage :2KW

Motor: AC380V 50HZ

Dimension :590mm x580mm x1020mm

Net weight :80kg
