

HST YES-300F digital display compression and flexural testing machine

Main Application

YES-300F digital display compression testing machine mainly used for concrete rupture strength testing, cement, plastic sand, and red brick building materials compression resist testing. Widely used in metallurgy, building materials, space flight and aviation, colleges and universities, R & D institution lines. The test operation and data processing meets standard requirements.

Product description:

- Structure: mainly composed by main unit, oil source and measuring control system.
- Measuring control system: The machine adopts hydraulic loading, the electronic testing load. With digital display load, loading rate, keeping maximum load, overload protection and outage data keeping and other.
- Safety protection device: When the test force exceed the 3% of the maximum test force, overload protection, the oil pump motor stop.
