

## YES-BG Sseries Digital Display Compression Testing Machine(4 column)

*Picture is for reference only*

### 1. Application

Digital display compression testing machine mainly used for concrete and other material compression resist testing. Widely used in metallurgy, building materials, space flight and aviation, colleges and universities, R&D institution lines. The test operation and data processing meets standard requirements.

### 2. Main Specifications.

|                           |                                        |               |
|---------------------------|----------------------------------------|---------------|
| Model                     | YES-2000BG                             | YES-1000BG    |
| Max. load                 | 2000kN/200Ton                          | 1000kN/100Ton |
| Machine Class             | 1 class                                |               |
| Range of test force       | 4% ~100%FS                             |               |
| Indicating value accuracy | ±1%                                    |               |
| Piston stroke             | 200mm                                  |               |
| Distance between platens  | 360mm                                  |               |
| Upper platen size         | Φ300mm (Can be customized)             |               |
| Lower platen size         | Φ300mm (Can be customized)             |               |
| Display                   | LCD Display Curves                     |               |
| Power supply              | AC380V/50Hz/3 phase(can be customized) |               |
| Size                      | 640×560×1500 mm                        |               |
| Weight                    | 1500 kg                                |               |
