

YES-EG Series Digital Display Compression Testing Machine

Picture is for reference only

1. Application

The compression testing machine with PC&Servo Control is designed for testing the compressive strength of building materials such as brick, cement mortar and concrete; it is electro-hydraulically powered and the pressure applied on the specimen can be displayed directly; The maximum force value can be maintained and the data measured can be saved when the power is off; The test data can be processed automatically and the test report can be printed

2. Main Specifications

Model	YES-2000EG	YES-1000EG
Max. load	2000kN/200Ton	1000kN/100Ton
Machine Class	1 class	
Range of test force	4% ~100%FS	
Host Structure	Double electric screw ball adjust test space	
Indicating value accuracy	±1%	
Piston stroke	150mm	
Distance between upper and lower platen	600mm	

Upper and lower platen size	300*300mm (Can be customized)
Display	LCD
Power supply	AC380V/50Hz/3 phase(can be customized)
Size	900×400×1150 mm
Weight	750kg
