

ASTM D1781 Climbing Drum Peel Testing Equipment

Applications:

ASTM D 1781 describes a method of measuring the strength of the adhesive bond between the core and the facing of a honeycomb core panel. The climbing drum peel fixtures meet the requirements of ASTM D 1781.

Features:

- Conforms to ASTM D 1781
- Versions for both rigid and flexible facing materials
- Suitable for non-ambient temperatures

Parameter:

Model	HST-GPT303A
Standards	ASTM D1781, GB/T 1457
Capacity	3kN
Specimen type	Sandwich
Temperature	0℃~40℃
