

HST-BKJ-110 Beveling Machine

Picture just for reference

I. Overview

This instrument is mainly used for chamfering plastic pipes with diameters of 40-110mm. Its key feature is complete cold cutting, without altering the pipe material.

II. Working Principle

Using specialized tools required for different chamfer angles, a milling cutter creates samples with chamfer angles of 10°, 20°, and 30°.

III. Equipment Parameters

Processing Range: Outer diameter 40-110mm

Bevel Thickness: 2-15mm

Motor Power: 1.4kw

Standard Configuration: One each of 10°, 20°, and 30° chamfering tools

IV. Configuration

Main Unit: 1 unit

Chamfering Tools: 10° (1 set)

Chamfering Tools: 20° (1 set)

Chamfering Tools: 30° (1 set)
