

DYQ-4T/DYQ-6T Automatic polishing dropper

I、 Product Introduction

DYQ-4T/DYQ-6T automatic polishing drops provide 4, 6 channels at different speeds at the same time, to add different grinding media.

The DYQ-4T/DYQ-6T automatic polishing dropper can be used in various grinding and polishing machines at home and abroad. It can automatically drop the polishing liquid to the grinding disc or polishing disc according to the speed required by different polishing materials to achieve the purpose of polishing.

II、 Product Features

- 1. Each channel is set separately and works simultaneously**
2. Connect with polishing machine and drop liquid according to grinding and polishing parameters set by grinding and polishing machine
3. Two working modes:
 - Manual
 - Online
4. Each mode can be set independently: drip speed, drip time
- 5. Automatically clean the dropper**
6. Larger or smaller dropper speed, customizable
- 7. Polishing liquid magnetic stirring function, speed independent adjustment (optional)**
