

HST-PCT-30 Pipe Cutting Saw

Application:

The HST-PCT-30 cutting machine is used for cutting and sampling non-metallic materials such as plastic, nylon, and plexiglass, as well as sheets and pipes. This versatile, easy-to-use, safe, and reliable cutting machine is an ideal tool for laboratories in production facilities, testing agencies, and universities.

Technical Parameters:

Model	HST-PCT-30
Cutting thickness of plates and pipes	30mm
Cutting length	160mm
Cutting width	155mm
Maximum cutting diameter	Φ 315 mm
Table stroke	300mm
Power supply	380V ± 10%, 50Hz, 370W
