

Electronic Rubber Tensile Extensometer

Picture just for reference

Electronic Rubber Tensile Extensometer

The long travel Extensometer, large deformation extensometer is specially developed for the testing of materials with large elongation (such as plastic, rubber, silicone, polyurethane, etc.).

According to ASTM D412 and ISO 37 standards, it is very suitable for testing dumbbell-shaped elastic specimens.

This extensometer always be used together with the Electronic Universal Testing Machine.

Specifications:

Range	25mm to 800mm
Range resolution	0.001mm
Accuracy	0.01 mm %
Max.sample thickness	10 mm
Max.sample width	30 mm
