

HST-100DL GSM circular cutter

Picture just for reference

Application:

The GSM circular cutter is a precision circular sample cutter designed and produced according to the QB/T1671 national industry standard.

Suitable for cutting high-precision standard samples. The sampling knife has beautiful appearance, compact and reasonable structure, easy installation and labor-saving operation. It is a necessary special sampling instrument for quantitative measurement in production and scientific research.

Technical specification:

1. Cut the sample area: 125cm²

2. Cutting thickness:

paper single layer or multiple layers: 0.1-5MM

Ordinary cardboard: (single layer) < 6mm

- 3. Sample cutting accuracy: ± 0.35
- 4. Overall dimensions (length x width x height): 200X250X370cm
- 5. Weight (kg): about 23kg
