

HST-321 Taber Abrasion resistance Testing Machine

Picture just for reference

Application

Taber abrasion test equipment is Used to test a wide spectrum of materials, the instrument has been referenced in numerous standards and specifications (including plastics, coatings, laminates, leather, paper, ceramics, carpeting, safety glazing, etc.).

Technical parameters

Model	HST-321
Item	Taber abrasion test equipment
Abrasion Wheel	Diameter 2 inches, Width 1/2 inches
Test Tray Rotating Speed	Use stepper motor, 1-100RPM, adjustable (default set value 60RPM)
Loading	250g, 750g, 1000g
Machine Weight	About 30Kg
Power supply	AC 220V
Counter	0~999999
Specimen Size	φ110mm, center hole φ7.5mm
