

HST-DB5-10 Electric marking machine for tensile test

Picture for reference only

Application

The motorised rebar marking machine is designed for steel reinforcement elongation marking instruments. It is more accurate than manual marking. The efficiency can be increased by several times.

This machine has features of precise height, easy operation and convenient movement. It is essential instrument for the laboratory.

Main parameters:

Product Name	Electric steel bar marking machine for rebar tensile test
Model	HST-DQ5-10
Marking Length	300mm
Print Gauge Length	5mm/10 mm
Specimen Diameter	6-36mm
Dimension	830x 250x300mm
Weight	45KG
Power	220V
