

HST JWJ-13 13mm Electric metal wire repeated bending test machine

Picture for reference only

Application:

This testing machine is mainly used for repeated bending test of metal wire and testing performance and defect of bearing plastic deformation at the process of bending metal wire repeatedly. You can operate on digital display screen and it shows bending times. It can also process sheet metal bending test after using sheet ice.

Standard:

ISO 7801 , NF A03-010 , DIN 51211 , GOST 1579 , GB238

Main technical parameters:

MOEDL	HST-JWJ13
Item	Parameters
Sample Diameter(mm)	Φ1-Φ12.5

Sample Length(mm)	150-200
Bending Angle	±90°
Bending Speed (times/min)	≤ 60
Numeration Range(time)	0-9999
Motor Power	1.1Kw
External Dimensions(mm)	1200*730*410
Tester Weight	About 250
