

ISO 5267 Beating Degree Equipment Measure Intensity Paper Pulp Refiner Machine

Picture for reference only

Application:

The instrument is suitable for the determination all kinds of pulp slurry no greater which less than 100 ° SR , it can be the most economical use of raw materials, know when stop beating timely in the production process, in scientific research as a determination of the state of the fiber. Manual control, simple operation.

Meet standards:

ISO 5267-1 GB/T3332-1982

Technical parameters

Measuring range	0-100 ° SR
Dividing value	1 ° SR
Testing distilled water temperature	20 + / - 0.5 ° C
Testing distilled water volume	1000 ml

Drainage time	149±1s
Installation dimensions	460 * 250 mm
Accessories	including 2 measuring cylinder 1 slice seal copper network one
