

JWJ-10 Electric metal wire repeated bending test machine

Application

This testing machine is mainly used for repeated bending test of metal wire and testing performance and defect of bearing plastic deformation at the process of bending metal wire repeatedly. You can operate on digital display screen and it shows bending times. It can also process sheet metal bending test after using sheet clamping device.

Application Range

ISO 7801 , NF A03-010 , DIN 51211 , GOST 1579 , GB238

Main Technical Specifications

Model	HST JWJ-10
Display mode	Touch screen display, automatic count

Specimen diameter	1~ 10mm
Specimen length	150~200mm
Bend angle	±90°
Bend frequency	<60rpm
Bend times	999999
Motor power	220V, 50Hz,1.5kw
Dimensions	600*500*1200mm
Weight	230kg
