

ONE1-M5 Video Extensometer For Tension Test

Picture just for reference

Application:

Video extensometer is an optical non-contact type three-dimensional deformation measuring system based on DIC(Digital Image Correlation)measurement method.

Features:

- I Default single cam measurement length:110mm (220mm)
- I Default resolution according to ISO9513: Class 0.5 (Class 1)
- I Default resolution according to ASTM E83-10: Class B-1(Class B-2)
- I Gauge Length: Selectable single or multiple points L0
- I Data acquisition rate: 75-500Hz
- I Transverse Measurement: Optional transverse or Bi-axial

I Axial and radial neck detection

No. 4915, Jingshi Road, Jinan, China

Tel:+86-15910081986

www.hssdgroup.com

- I Output: Digital and analog
- I Lighting: Auto switching monochromatic light
- I Software Integrated: via Extensometer user interface**
- I Mounting: Test frame, chamber or Tri-pod
